ALLOWANCE

Allowable Subject Matter

1. **Claims 3, 6, 9-13, 20, 21 and 25** are allowed. These claims will be renumbered as 1-10.

2. The following is an examiner's statement of reasons for allowance:

Independent claims 3 and 9 define a system for generating a web page displaying a list of communication details associated with the image data transmitted or received through the facsimile communication wherein an access determining unit determines whether to allow access to the image data when the image data when the image data is transmitted or received through facsimile communications, and the first storage commanding unit stores only the communication details in the image storing unit when the access determining unit determines not to allow access based on the communication details and stores the communication details and the associated image data in the image storing unit when the access determining unit determines to allow access based on the communication details. The claims distinguish over the prior art in that the first storage commanding unit stores only the communication details in the image storing unit when the access determination unit determines not to allow access based on the communication details.

Independent claims 6, 20 and 25 define a system for generating a web page displaying a list of communication details associated with the image data transmitted or received through the facsimile communication wherein the page generating unit generates a first list page in which is displayed a list of communication details

Art Unit: 2625

associated with image data for which the access determining unit determined to allow access and hyperlinks to the communication details, and a second list page in which is displayed a list of communication details associated with image data for which the access determining unit determined not to allow access and hyperlinks to the communication details, and wherein the page distributing unit distributes the first list page unconditionally and distributes the second list page only when specific distribution conditions have been met. The claims distinguish over the prior art in that the second list page in which is displayed a list of communication details associated with image data for which the access determining unit determined not to allow access and hyperlinks to the communication details, and wherein the page distributing unit distributes the first list page unconditionally and distributes the second list page only when specific distribution conditions have been met.

The most relevant prior art Bobo (US 6,350,066) discloses a page generating unit that generates a list page, the list page being a web page displaying a list of communication details associated with the image data transmitted or received through the facsimile communications, the list of communication details including hyperlinks to the associated image data stored in the image storing unit. However, Bobo does not teach the applicant's claimed combination of the access determining unit and the storage unit for storing only the communication details and the second list page.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
